VYOMA
INTERIORS

WEBSITE EXPERIENCE / REFINED EDITION

A premium studio. A clearer decision.

A4 design and conversion blueprint for one scrolling website.

HOMEOWNERS FIRST / PROOF BEFORE CLAIMS / FRICTIONLESS ENQUIRIES

Brand colours: #07745D + #B88917 | 14 purposeful website sections

Make the website easier to trust, easier to use, and easier to contact.

One scrolling website, designed around homeowner decisions rather than a long catalogue of sections.

THE CORE VISITOR JOURNEY

01	02	03	04
RECOGNISE	**UNDERSTAND**	**TRUST**	**ACT**
This is for my kind of home.	I know what Vyoma can execute.	I can see how the work is managed.	I can describe my project quickly.

THE REVISED 14-SECTION SCROLL

SITE MAP

01 Header 02 Hero 03 Verified proof 04 Homeowners
05 Four services 06 Real work 07 Process & commitments
08 Pricing clarity 09 Professional partners 10 Locations
11 Testimonials & Instagram 12 FAQs 13 Project enquiry 14 Footer & QR

WHAT CHANGED FROM THE PREVIOUS BLUEPRINT

Reduced 18 sections to 14 by combining overlapping content. Removed the separate project selector and duplicate pre-enquiry CTA; their useful functions now live inside the hero and form.

WHAT THIS SHOULD FEEL LIKE

Confident, calm, editorial and easy to navigate. Not a noisy interior-design catalogue, a generic contractor website or a long sales pitch.

PRIMARY CUSTOMER

Homeowners: independent houses, villas, independent floors and apartments. Show these first and give them the shortest path to a consultation.

SECONDARY CUSTOMER

Builders, architects and real estate companies get a dedicated work-package route. Commercial/retail remains a minor supporting enquiry type.

IMPORTANT GUARDRAIL

All counts, customer reviews, project photographs, serviceability and pricing claims must be approved before publication. This PDF is a proposed design system, not proof of business performance.

Editorial confidence, not decorative excess.

Fixed brand identity, large typography, deliberate white space and precise interaction patterns.

PRIMARY GREEN	SIGNATURE GOLD	WHITE	NEAR BLACK
#07745D	#B88917	#FFFFFF	#121212

TYPE SCALE / SUGGESTED IMPLEMENTATION

Hero H1	Desktop 56–72 px | Mobile 36–44 px	Editorial serif, bold but not heavy; 1.0–1.12 line-height.
Section H2	Desktop 40–52 px | Mobile 29–36 px	Large, concise, no unnecessary subheadlines.
Card H3	Desktop 23–28 px | Mobile 21–24 px	Serif or confident sans; preserve hierarchy.
Body copy	Desktop 16–18 px | Mobile 16 px	High contrast, 1.5 line-height; short paragraphs.
Navigation / UI	14–16 px | Buttons 16–17 px	Use a modern sans; clear labels, never tiny tap targets.

FONT DIRECTION

Headlines: a high-contrast editorial serif such as Cormorant Garamond or a comparable licensed web font. UI/body: Inter, Manrope or comparable. Designer to confirm licensing and actual render.

IMAGE DIRECTION

Large photographs of genuine spaces and workmanship. Prefer natural daylight, controlled warm lighting, consistent crops and visible detail. Stock images may illustrate style but must never be presented as delivered work.

MOTION & INTERACTION

Restrained 200–300 ms fades; no auto-playing heavy video, intrusive pop-ups or moving text. Slider controls must be accessible; pause auto-rotation and respect reduced-motion preferences.

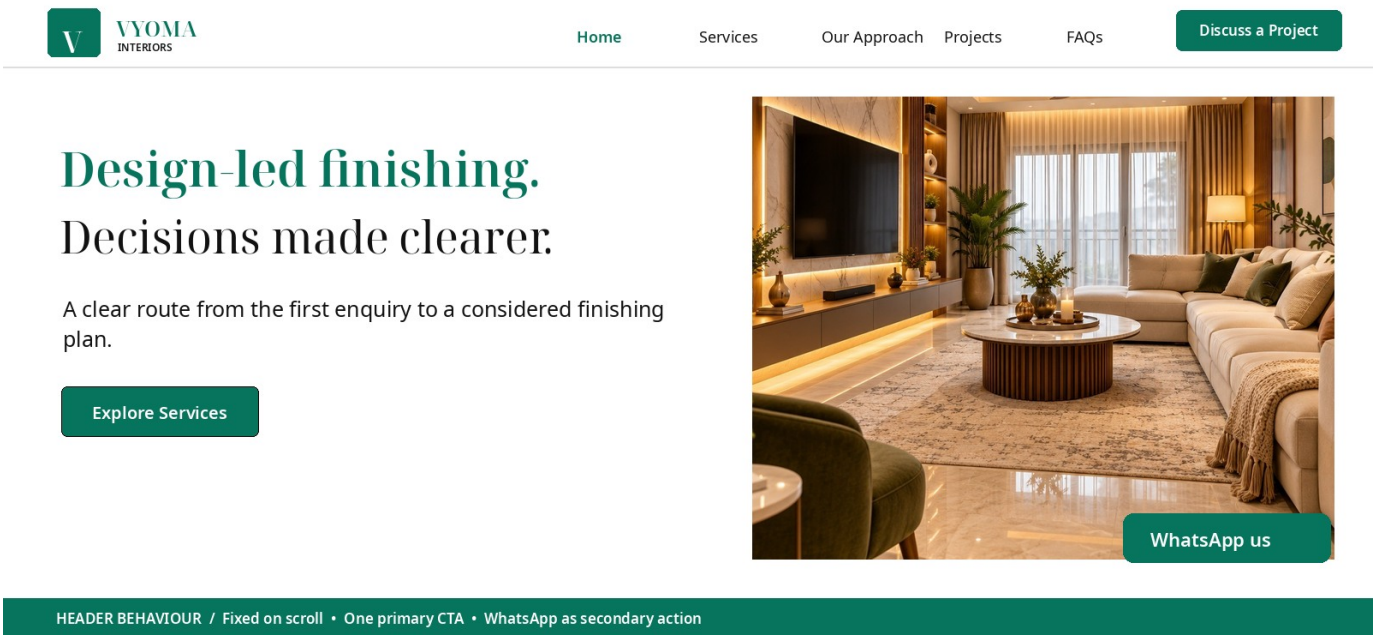

MOBILE-FIRST RULE

Sticky WhatsApp or Discuss Project action, but not both competing. Tap targets at least 44 px; visible form labels; readable text; compressed images; no horizontal overflow.

01 / WEBSITE CHROME

Header & navigation

Make the next step obvious without turning the header into a menu.

HEADER BEHAVIOUR / Fixed on scroll • One primary CTA • WhatsApp as secondary action

CUSTOMER PSYCHOLOGY

Visitors scan for identity, service relevance and a trustworthy way to contact the studio within seconds.

CONVERSION DECISION

Use a fixed header with 4–5 anchors, one main “Discuss a Project” button and a smaller WhatsApp action.

COPY / COMPONENTS

Original logo; Services; Projects; Our Approach; FAQs; Discuss a Project. Add city context without overstating nationwide execution.

MOBILE / HANDOFF

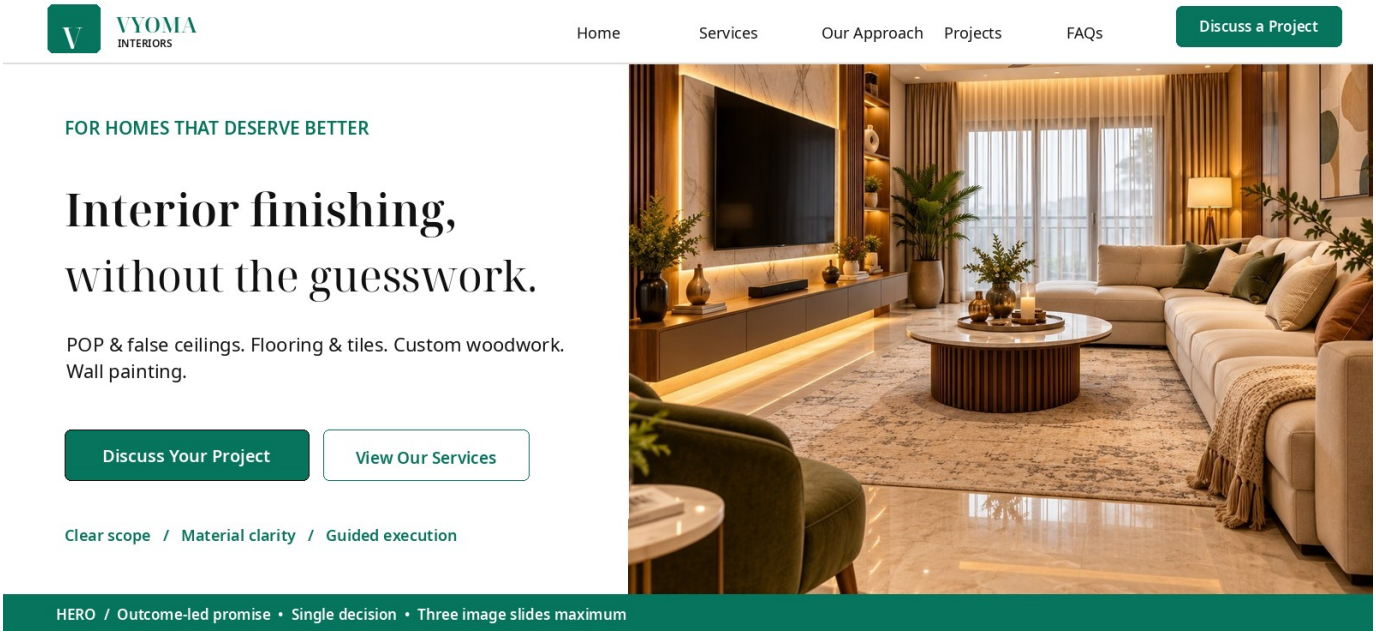

Logo, menu and one sticky contact action. Header should shrink on scroll and remain accessible to screen readers.

DESIGN / CLAIMS NOTE

Navigation labels are short, task-based and anchor to real page sections. Do not add a second oversized announcement bar on mobile.

Hero & controlled image slider

Lead with the outcome homeowners want, then show exactly what Vyoma executes.

CUSTOMER PSYCHOLOGY

Homeowners worry about confusion, material surprises and execution quality. An outcome-led promise addresses that uncertainty.

CONVERSION DECISION

One prominent “Discuss Your Project” CTA; secondary “View Our Services”. Limit slider to three images, each with the same CTA destination.

COPY / COMPONENTS

H1: “Interior finishing, without the guesswork.” Service line: POP, flooring, woodwork and wall painting. Support: clear scope, material clarity, guided execution.

MOBILE / HANDOFF

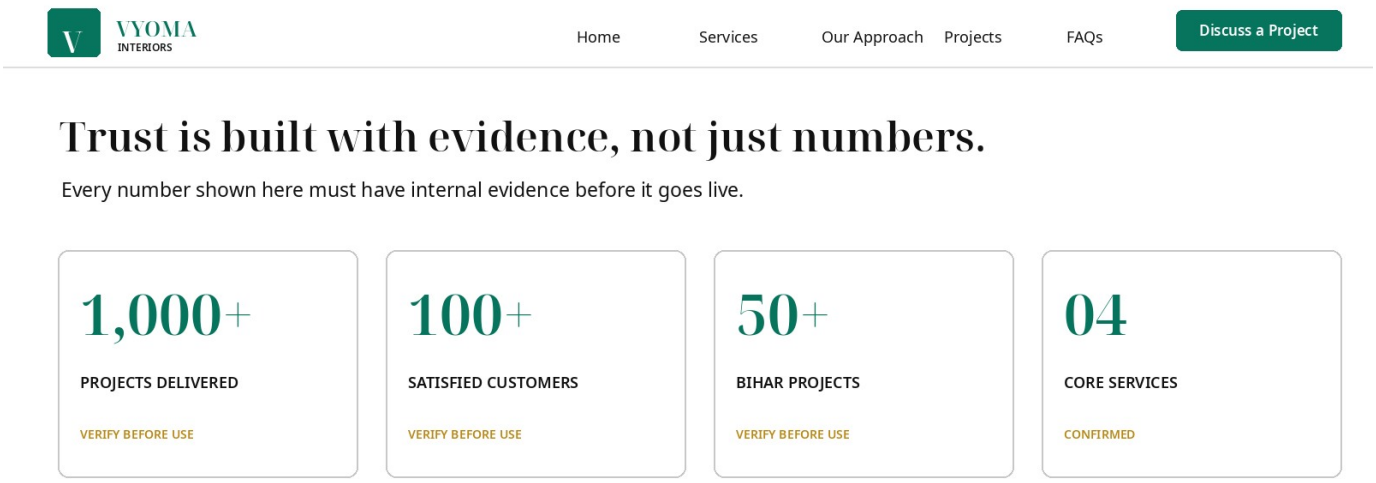

Use a static first hero image for performance; visible CTA above the fold; manual slide controls with meaningful alt text.

DESIGN / CLAIMS NOTE

This is proposed positioning, not a verified performance claim. A/B test it against “Thoughtful finishes for the home you love.”

Verified proof & project signals

Do not sacrifice trust for impressive but unsupported numbers.

PROOF STRIP / Verified counts only • Prefer real project evidence over vanity metrics

CUSTOMER PSYCHOLOGY

Large figures create authority only when they feel believable. Unverifiable counts can produce the opposite effect.

CONVERSION DECISION

Use up to three verified stats, then direct people to real project photographs and the process section.

COPY / COMPONENTS

Requested: 1,000+ projects, 100+ satisfied customers, 50+ Bihar projects. All are placeholders pending documentary verification. “Four core services” can be shown now.

MOBILE / HANDOFF

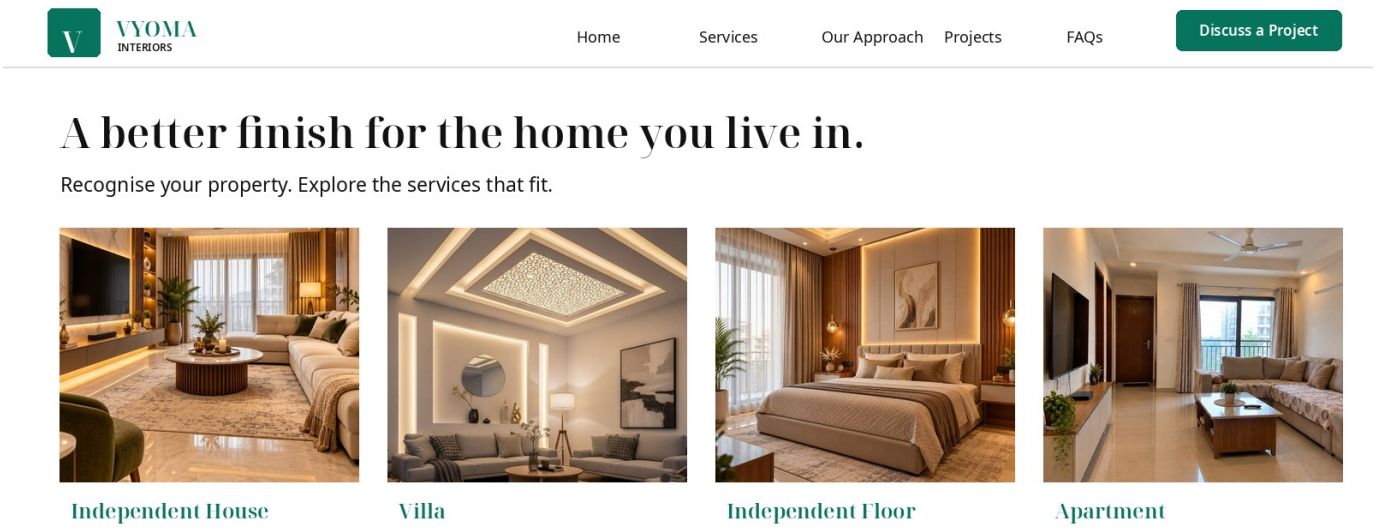

Two-column or horizontal-scroll proof cards with accessible labels. Remove unverified numbers entirely at launch.

DESIGN / CLAIMS NOTE

Better to show two real, named project case studies than four unverified statistics. A trust section is not a licence to invent evidence.

Homeowners & property types

Help visitors immediately identify themselves in the offering.

PRIMARY AUDIENCE / Independent houses • Villas • Independent floors • Apartments

CUSTOMER PSYCHOLOGY

Recognition reduces effort: “They understand the kind of property I have.” This matters more than generic luxury claims.

CONVERSION DECISION

Four clear cards: Independent House, Villa, Independent Floor and Apartment. Each card opens the same form with property type preselected.

COPY / COMPONENTS

Headline: “A better finish for the home you live in.” Explain renovation and new-home scopes without claiming full turnkey architecture services.

MOBILE / HANDOFF

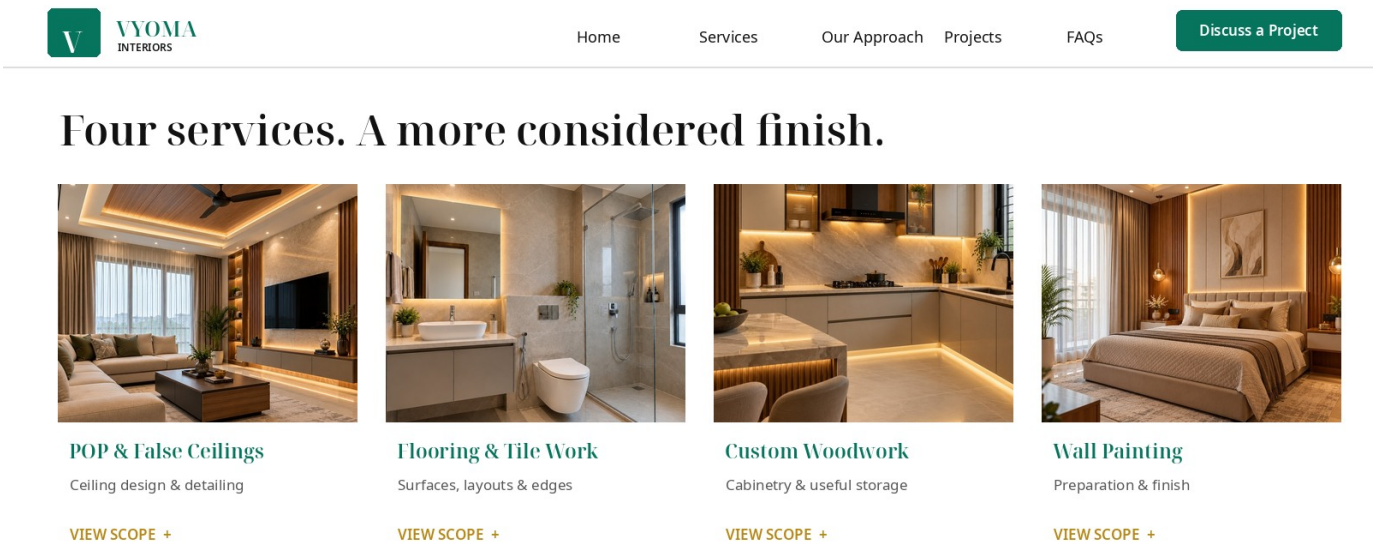

Two-column grid; avoid image-only cards; keep service type and button labels visible without hover.

DESIGN / CLAIMS NOTE

Commercial and retail work may appear as a small line under the grid, not as an equal fifth homeowner card.

Four core service cards

Sell the clarity of the work, not just attractive finished rooms.

SERVICES / Explain inclusions, materials and outputs before asking for a quote

CUSTOMER PSYCHOLOGY

Visitors need to know whether the studio can deliver their specific work before sharing contact details.

CONVERSION DECISION

Each card reveals scope examples, common materials, typical decisions and a “Discuss this service” form prefill.

COPY / COMPONENTS

POP & False Ceilings; Flooring & Tile Work; Custom Woodwork; Wall Painting & Finishes. Use distinct, relevant photographs.

MOBILE / HANDOFF

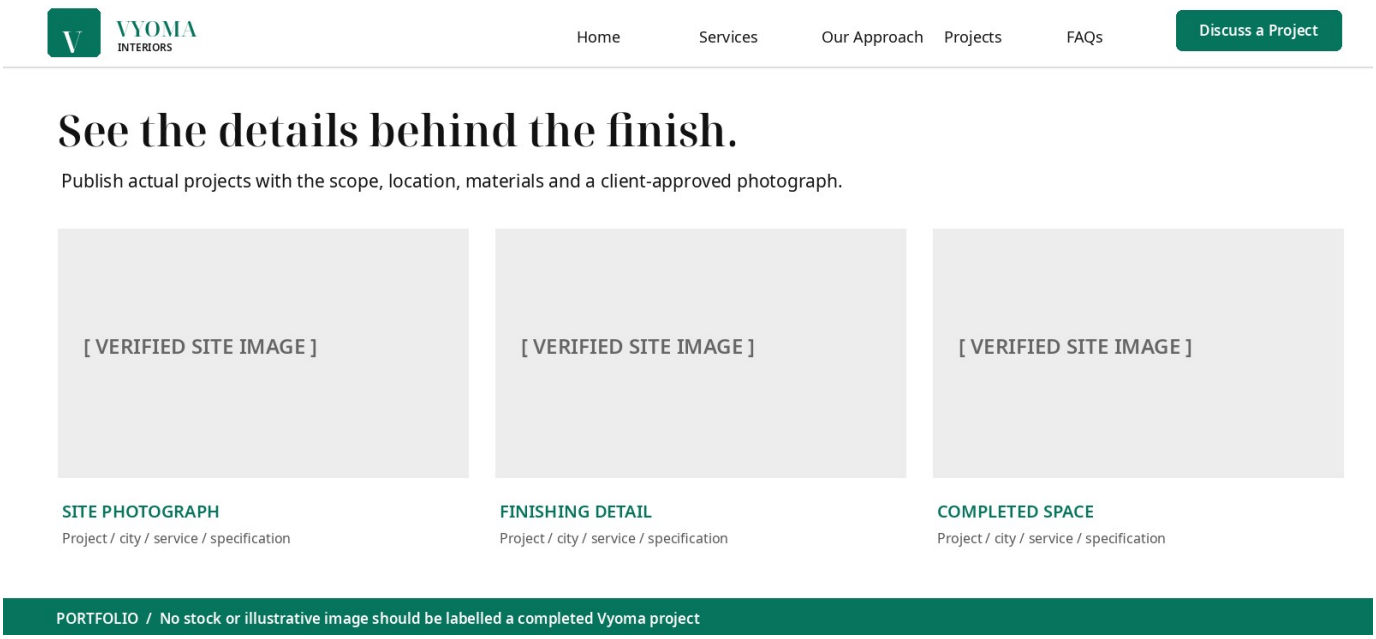

Stack service cards with image, title, 2-line scope and text link. No carousels that hide half the service catalogue.

DESIGN / CLAIMS NOTE

Do not add modular kitchens, architecture or turnkey interiors as standalone services unless Vyoma actually offers them.

Selected work & workmanship gallery

Replace decorative imagery with genuine project evidence as it becomes available.

CUSTOMER PSYCHOLOGY

Homeowners want to see proof of execution, not just visual taste. Show the process and workmanship details.

CONVERSION DECISION

Case-study cards: city, property type, services delivered, materials/finish, actual photographs and client-approved caption.

COPY / COMPONENTS

Headline: “See the details behind the finish.” Until evidence is approved, show a clearly labelled inspiration gallery instead.

MOBILE / HANDOFF

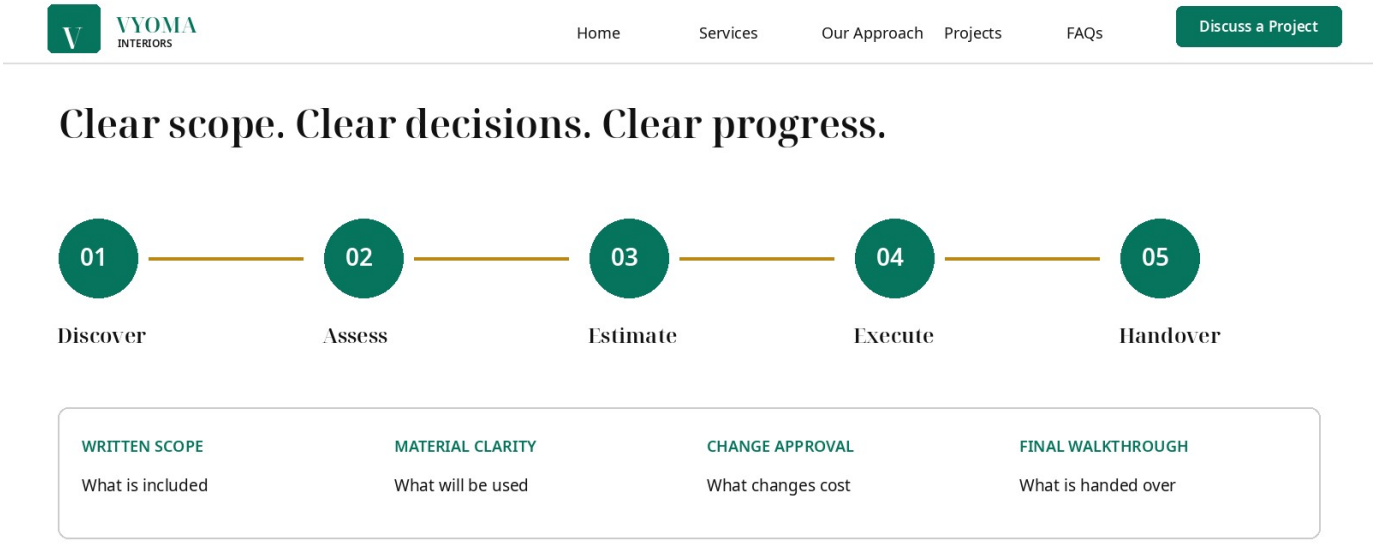

Swipeable gallery with captions and thumbnails; alt text describes the actual photographed work.

DESIGN / CLAIMS NOTE

Never fabricate before/after pairs, completed-project photos, project locations, dates or client approvals.

Project process & client commitments

Turn “quality” and “on-time work” into concrete checkpoints.

PROCESS + COMMITMENTS / Turn vague quality promises into practical project checkpoints

CUSTOMER PSYCHOLOGY

Customers fear delays, hidden changes and miscommunication. Process visibility reduces uncertainty.

CONVERSION DECISION

Five steps: Discover Assess Estimate Execute Handover. Pair with four commitments: written scope, material clarity, change approval and final review.

COPY / COMPONENTS

Use “Agreed milestones and progress updates” instead of promising universal deadlines. Explain that schedules depend on site readiness and approved scope.

MOBILE / HANDOFF

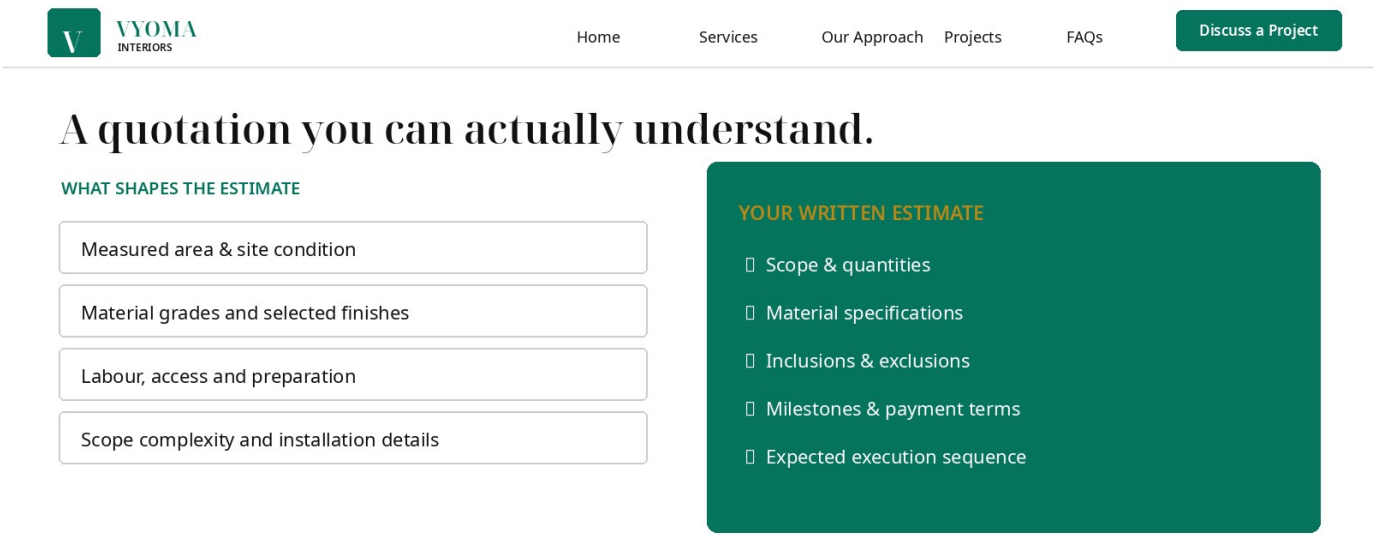

Vertical stepper with one sentence per stage. Optional downloadable sample scope only if an actual approved sample exists.

DESIGN / CLAIMS NOTE

Avoid “guaranteed on-time delivery” unless the business has enforceable contractual terms and evidence to support it.

Pricing & what a quotation includes

Give customers enough clarity to enquire without inventing a rate card.

PRICING / No invented rate card • Explain what is and is not included

CUSTOMER PSYCHOLOGY

People want to know what drives cost and what might be excluded. Silence around pricing often feels risky.

CONVERSION DECISION

Explain estimating inputs, written inclusions/exclusions, materials, labour, milestones and taxes as applicable; then invite a project brief.

COPY / COMPONENTS

Headline: “A quotation you can actually understand.” CTA: “Request a Project Estimate.” No unapproved ₹/sq ft rates.

MOBILE / HANDOFF

Short accordion for cost drivers; CTA anchored to prefilled enquiry form; show whether site assessment may be needed.

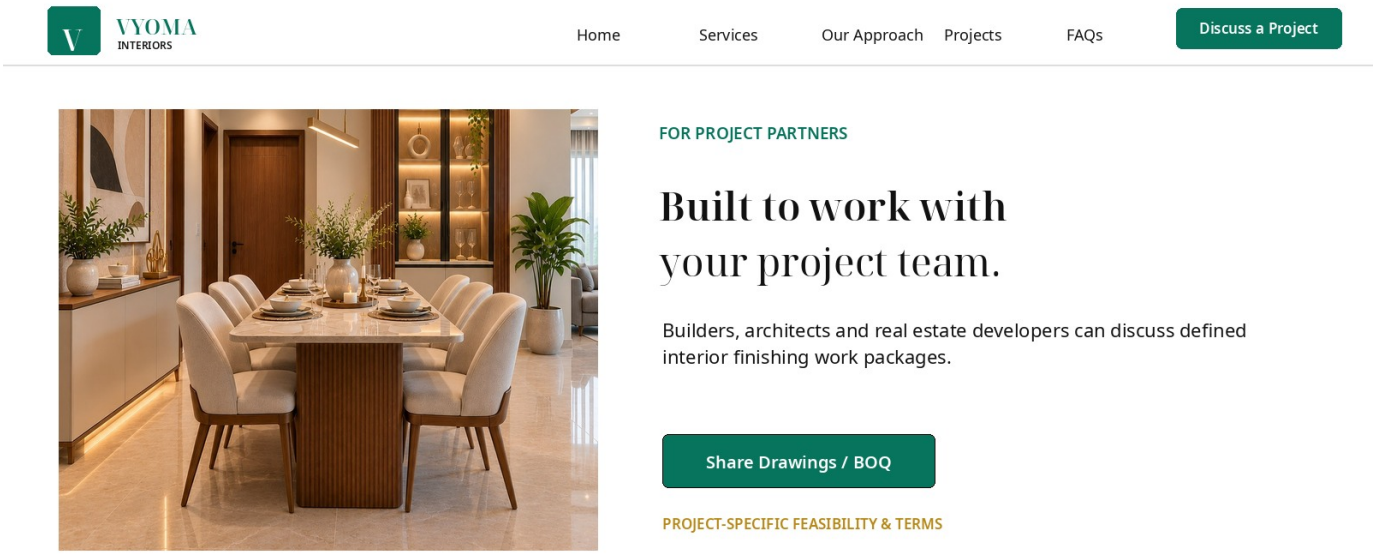

DESIGN / CLAIMS NOTE

The quote must be described as project-specific. Never imply that submitting the form guarantees an instant final price.

09 / B2B ROUTE

Builders, architects & real estate companies

Offer a credible secondary path without diluting the homeowner focus.

CUSTOMER PSYCHOLOGY

Professional buyers look for scope discipline, documentation, BOQs, sequencing and site coordination rather than décor inspiration.

CONVERSION DECISION

One dedicated section and “Share Drawings / BOQ” CTA. The form should switch to professional enquiry fields.

COPY / COMPONENTS

Show only verified capabilities: finishing packages, work against approved drawings, material coordination and execution planning where available.

MOBILE / HANDOFF

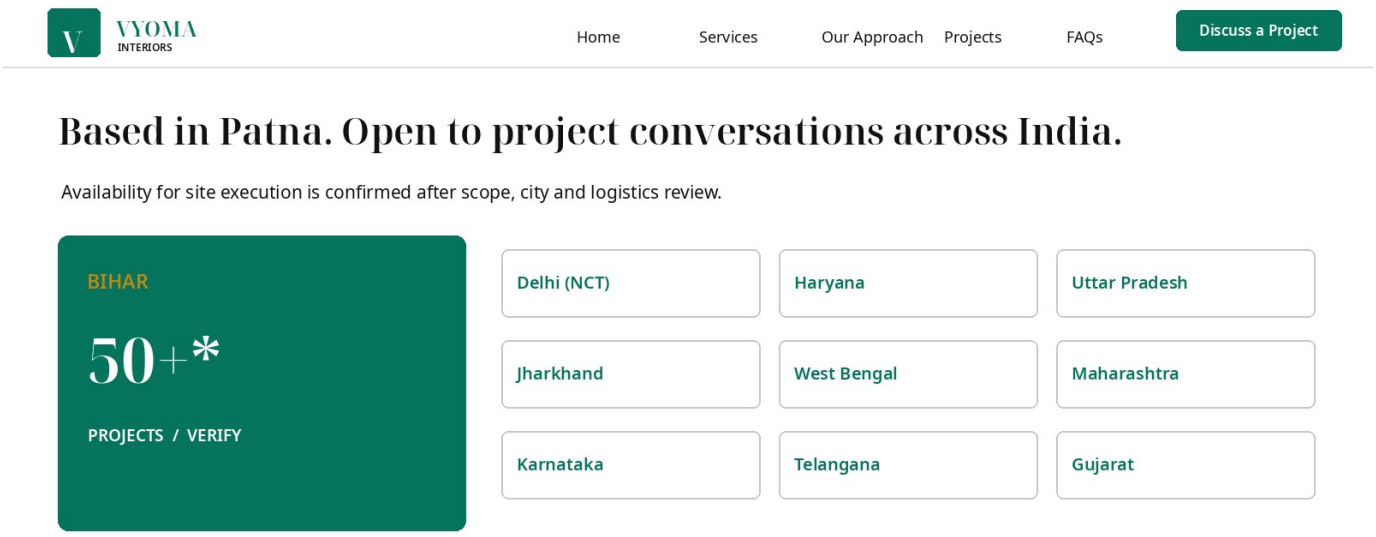

Short copy, one image, one CTA. Ask company, role, project city, stage, work package, expected timeline and optional drawing upload.

DESIGN / CLAIMS NOTE

Do not promise nationwide project teams, bulk capacity or procurement capabilities without operational confirmation.

Service regions with Bihar emphasis

Signal location confidently without suggesting unsupported pan-India execution.

CUSTOMER PSYCHOLOGY

Visitors want to know whether their city is practical before investing time in a conversation.

CONVERSION DECISION

Lead with “Based in Patna”; accept enquiries from all Indian states and UTs, but review site feasibility before accepting work.

COPY / COMPONENTS

Feature Bihar plus Delhi (NCT), Haryana, Uttar Pradesh, Jharkhand, West Bengal, Maharashtra, Karnataka, Telangana and Gujarat. “50+ Bihar projects” is unverified.

MOBILE / HANDOFF

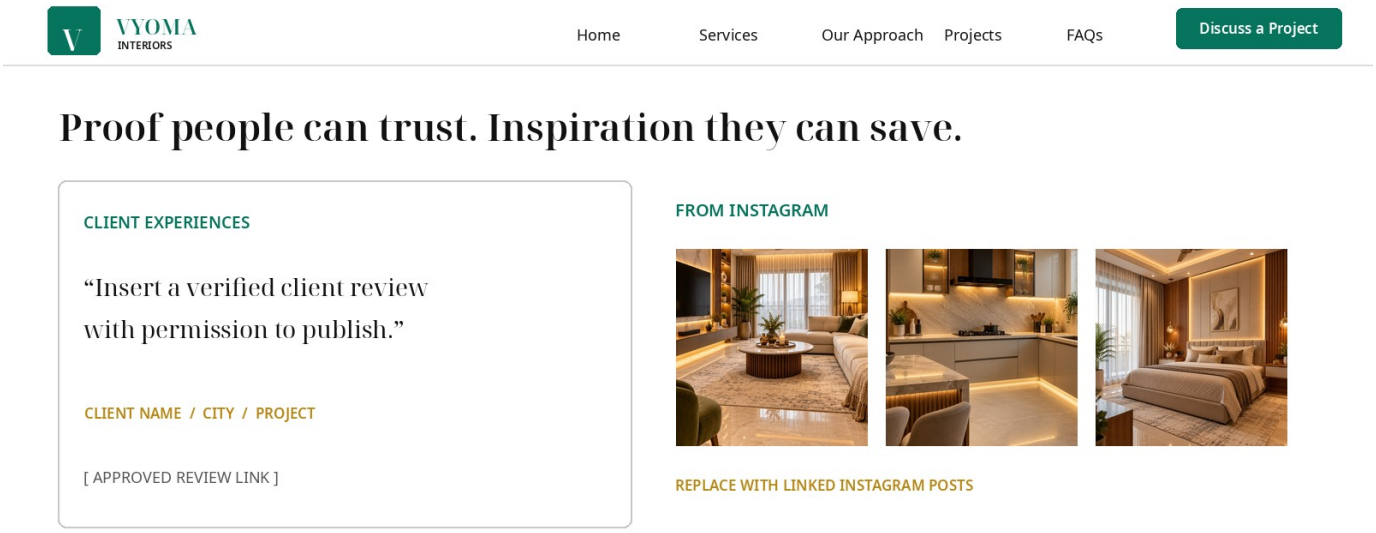

Searchable state/UT selector in form; no giant location dropdown in the hero; surface city feasibility after lead capture.

DESIGN / CLAIMS NOTE

Featured regions are suggested marketing priorities, not evidence of completed projects or active execution coverage.

Client testimonials & Instagram inspiration

Pair authentic reassurance with easy-to-browse visual inspiration.

TRUST + SOCIAL / Real testimonials and linked posts only • No fabricated quotes

CUSTOMER PSYCHOLOGY

Reviews reduce perceived risk; Instagram helps visitors understand taste and style. These are different jobs, so label them distinctly.

CONVERSION DECISION

Show 1–3 approved testimonials and 3–4 linked Instagram posts in a single compact section. Each post opens the original.

COPY / COMPONENTS

Review: quote, client name or permitted initials, city, project type, source link. Instagram: real posts with captions, not invented engagement counts.

MOBILE / HANDOFF

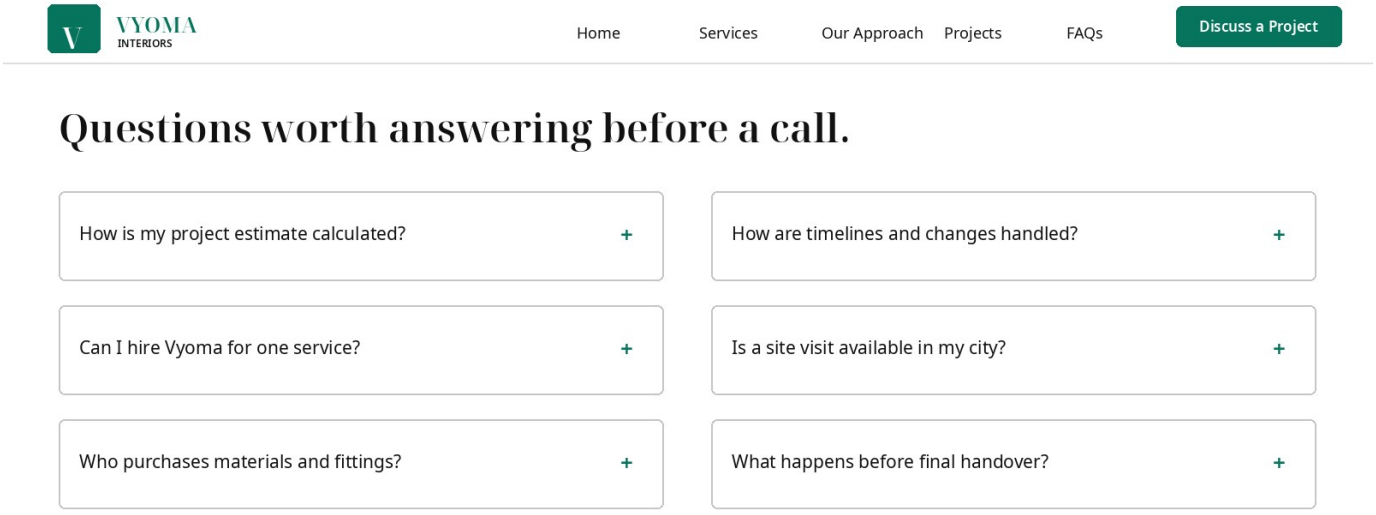

One review at a time; social posts horizontally scroll with keyboard controls; lazy-load third-party embeds.

DESIGN / CLAIMS NOTE

If no reviews exist, remove the testimonial panel rather than using fictional quotes or unlabelled placeholder praise.

Frequently asked questions

Answer the last practical questions before the form.

FAQ / Short factual answers • No unsupported warranties or guaranteed deadlines

CUSTOMER PSYCHOLOGY

Unanswered questions about costs, materials, timelines and payments create hesitation at the final step.

CONVERSION DECISION

Six visible accordion questions; provide four more in an optional “See all questions” expansion. Answers should be factual and concise.

COPY / COMPONENTS

Prioritise estimate calculation, single-service eligibility, materials, timelines and changes, site visits, handover.

MOBILE / HANDOFF

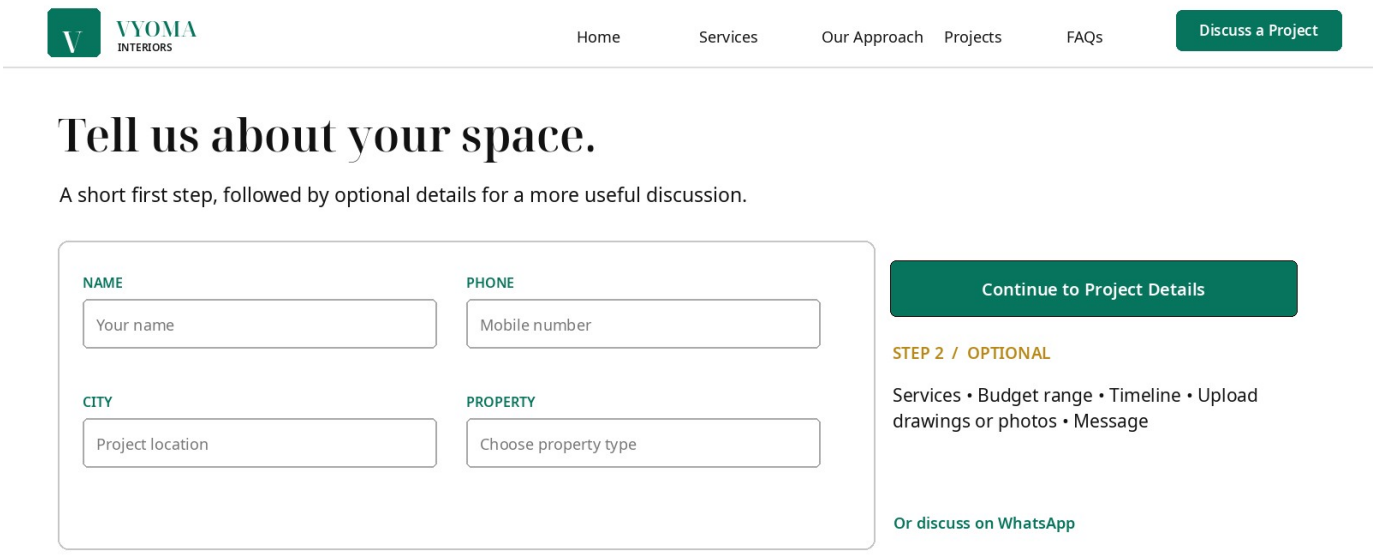

Native accessible accordion; first question open by default only if it helps; avoid scrolling traps.

DESIGN / CLAIMS NOTE

No unsupported warranty promises, precise timelines, “free” site visits or payment policies without client approval.

Custom project enquiry form

Collect a useful brief without asking visitors to complete a tender document.

ENQUIRY FORM / Essential fields first • Budget and uploads optional • Consent included

CUSTOMER PSYCHOLOGY

A short first step lowers effort. More detailed questions feel reasonable after the visitor has already started.

CONVERSION DECISION

Step 1 required: name, mobile, city/state, property type and service(s). Step 2 optional: stage, approximate budget, timeline, photos/drawings and message.

COPY / COMPONENTS

CTA: “Send My Project Brief.” Consent note: “We will use your details to respond to this enquiry.” Add WhatsApp alternative.

MOBILE / HANDOFF

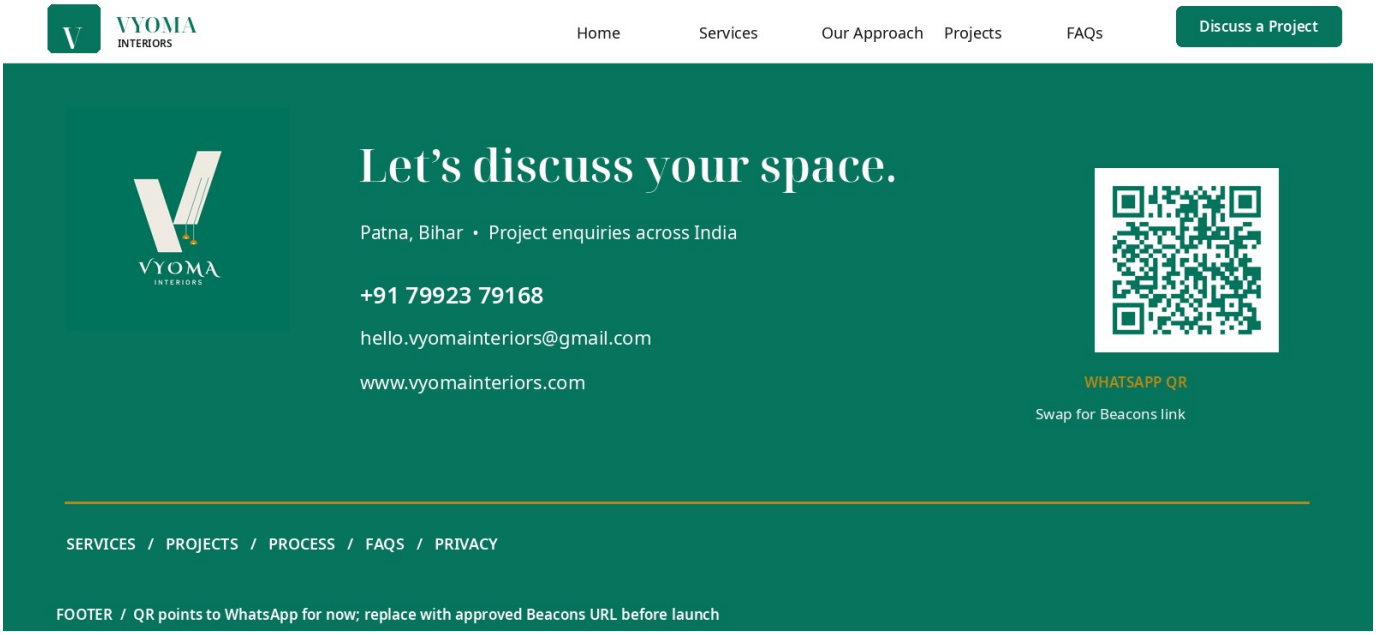

Single-column, persistent labels, clear errors, progress indicator, spam protection and a success state with next-step expectations.

DESIGN / CLAIMS NOTE

Use a separate conditional path for builders/architects. Track completed forms and qualified leads, not only button clicks.

Footer, contact details & QR hub

End with every reliable way to contact the business.

CUSTOMER PSYCHOLOGY

Visitors who scroll to the bottom often want confirmation: contact details, social links, service area and privacy information.

CONVERSION DECISION

Repeat the primary contact CTA, phone/WhatsApp, email, website and key anchors. QR supports desktop visitors but does not replace clickable mobile links.

COPY / COMPONENTS

Phone +91 79923 79168; hello.vyomainteriors@gmail.com; www.vyomainteriors.com. Beacons QR destination to be supplied.

MOBILE / HANDOFF

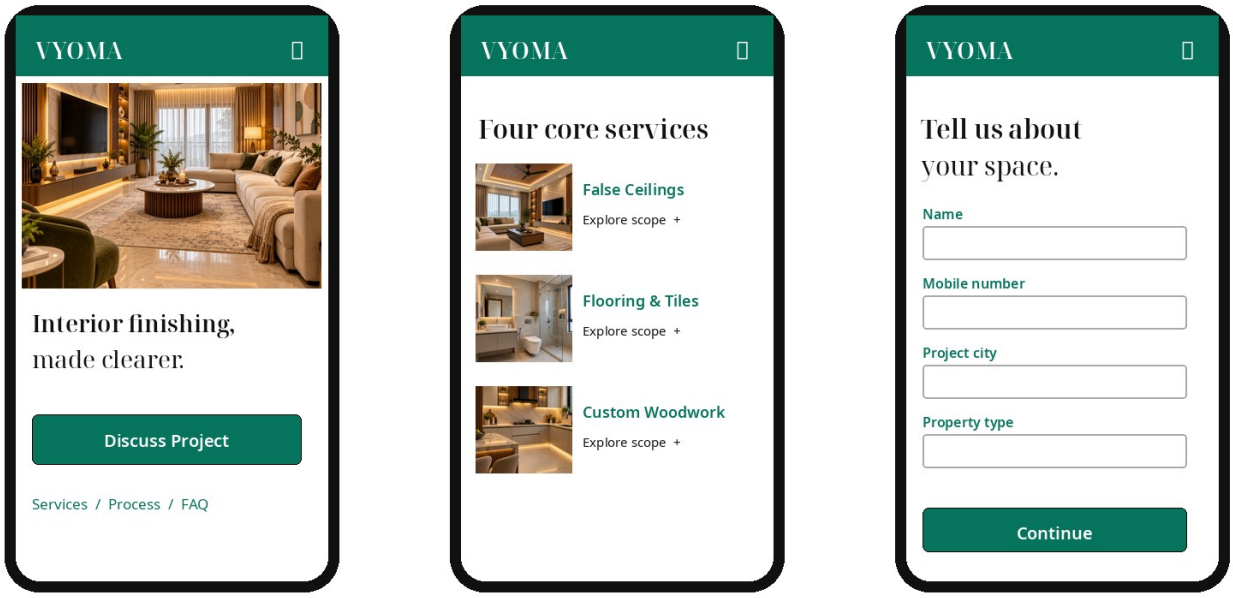

Use a direct Beacons link button; QR is secondary. The sample QR shown currently opens WhatsApp and must be replaced once Beacons URL is approved.

DESIGN / CLAIMS NOTE

Footer legal links and privacy notice should be real pages, not dead placeholders.

Mobile should feel simpler, not smaller.

A majority-mobile design hypothesis: clear actions, real images, fast rendering and readable forms. Confirm actual device mix in analytics.

STICKY CONTACT RULE

Use one persistent mobile contact action. A floating WhatsApp bubble is fine only when it does not cover form controls, privacy notices or accessibility widgets.

MEDIA & SPEED

Serve AVIF/WebP where supported, responsive sizes, lazy-load below-the-fold images, avoid heavy Instagram embeds and reserve image dimensions to prevent layout shifts.

INTERACTION DETAILS

Buttons and form controls should be at least 44 px high. Visible focus states, proper labels, keyboard-friendly accordion and carousel, and reduced-motion support are required.

COPY RHYTHM

Hero headline: two to three lines. Section headings: one to two lines. Body: 16 px or more. No microtype, all-caps paragraphs or dense footnotes.

One primary action, three useful visitor paths.

The form is the conversion centre; all other buttons should either help a decision or prefill the brief.

HOMEOWNER

Hero property type service process/pricing form

Prefill property and service. Optional budget and uploads.

PROFESSIONAL

Partner section Share Drawings / BOQ professional form

Ask company, role, work package, city, stage and optional files.

NOT READY

Services real work FAQs Instagram / WhatsApp

Allow browsing without a modal or forced contact request.

HIGH-INTENT CTA MICROCOPY

Discuss Your Project	Hero and sticky header; takes user to form with smooth scroll.
Request a Project Estimate	Pricing section; opens form with pricing intent preselected.
Discuss This Service	Each service card; preselects the service.
Share Drawings / BOQ	Professional section; shows professional form path.
Send My Project Brief	Form submission; confirm what happens next.

MEASUREMENT PRIORITY

Measure qualified enquiry submissions and conversations by property type, city, service, source and follow-up outcome. Click-through rates alone cannot prove conversion quality.

FAQ copy bank / Questions 01–05

Ready-to-edit answers for the site. Final language must reflect Vyoma's actual operating policies.

01 / Can I hire Vyoma for only one service?

Yes. Enquiries can be for ceilings, flooring, custom woodwork or wall painting individually. Feasibility and scope are confirmed after reviewing the property.

02 / How will the cost of my project be calculated?

The estimate depends on measurements, site condition, materials, design details and labour. The written quote should clarify what is included and excluded.

03 / Who purchases the materials?

Material procurement responsibilities should be agreed before work begins. Approved brands, grades, finishes and responsibilities should be recorded in the scope.

04 / Do I need complete design drawings?

You can start with requirements, measurements or reference images. Detailed drawings or approvals may be needed before certain execution work begins.

05 / How long will my project take?

Duration depends on work scope, site readiness, material availability and coordination. A project-specific schedule should be agreed after assessment.

EDITORIAL RULE

Answer what is known, explain what needs a project assessment, and never invent warranties, free visits, fixed lead times or rates.

FAQ copy bank / Questions 06–10

Ready-to-edit answers for the site. Final language must reflect Vyoma's actual operating policies.

06 / Is a site visit available in my city?

Share your project location and requirements. The team can then confirm whether a visit is feasible and whether any visit charges apply.

07 / Can I change finishes during the project?

Changes can be discussed and documented. Any cost or timeline implications should be approved before revised work starts.

08 / Does Vyoma accept enquiries outside Bihar?

Yes, enquiries are welcome across India. Execution feasibility, site logistics and commercial terms are reviewed individually.

09 / How are payment milestones decided?

Payment terms should be stated in the approved quotation or agreement, including applicable taxes and any material advances.

10 / What happens at handover?

The agreed work and visible finishes should be reviewed against the approved scope. Any observations are documented and discussed during project closure.

EDITORIAL RULE

Answer what is known, explain what needs a project assessment, and never invent warranties, free visits, fixed lead times or rates.

Capture enough to qualify, not enough to exhaust.

One mobile-first form with two short steps and conditional professional fields.

Name	Required	Text, 2–80 chars
Mobile number	Required	India +91 format; validate and confirm consent
Project city + state/UT	Required	Searchable city + complete state/UT selector
Property type	Required	House / Villa / Independent Floor / Apartment / Commercial / Other
Required services	Required	Multi-select: four core services
Project stage	Optional	Planning / New construction / Renovation / Ongoing
Budget range	Optional	Not decided / ranges approved by client
Desired start	Optional	As soon as practical / 1–3 months / Later
Photos or drawings	Optional	Safe file types; max size; consent to upload
Notes	Optional	Free text, with character limit

PROFESSIONAL ENQUIRY BRANCH

Show Company / Role / Project Type / Drawings or BOQ / Project City / Scope / Expected Timeline. Keep drawing upload optional; allow WhatsApp or email fallback.

FORM SUCCESS STATE

“Thank you. Your project brief has been received. Our team will review your requirements and contact you using the details provided.” Only promise a response time if Vyoma can consistently meet it.

SECURITY & PRIVACY

Add spam protection, file validation, explicit consent, a working privacy page, secure storage and notifications. Do not send uploaded files through insecure public links.

07 / COVERAGE & CLAIMS

Present reach carefully. Verify every proof point.

Enquiry coverage is not the same as an active local execution team.

FEATURED LOCATIONS / 10 STATES & UTs

BIHAR / PRIMARY	NORTH & EAST	WEST & SOUTH
Patna base; 50+ projects is a proposed claim requiring proof.	Delhi (NCT), Haryana, Uttar Pradesh, Jharkhand, West Bengal	Maharashtra, Karnataka, Telangana, Gujarat

CLAIMS CONTROL TABLE

1,000+ total projects delivered	**DO NOT PUBLISH until verified**	Project register, invoices or delivery records
100+ satisfied customers	**DO NOT PUBLISH until verified**	Count definition + customer records
50+ Bihar projects	**DO NOT PUBLISH until verified**	Bihar-specific project evidence
Pan-India execution	**REPHRASE as enquiries across India**	Serviceability and deployment policy
On-time delivery	**REPHRASE as agreed milestones**	Actual timelines and contractual terms
Client testimonials	**PUBLISH ONLY with consent**	Approved quote and source link

STATE / UNION TERRITORY FORM SELECTOR

Include all 28 states and 8 union territories in the form dropdown, but do not claim active delivery in every one. Use the city and scope to assess feasibility.

IMPORTANT

The featured ten regions are a proposed marketing display list, not a record of project delivery. Confirm and revise them with Vyoma before launch.

A premium website is only as good as its real-world performance.

Treat the proposed UX as a testable design hypothesis and improve it using actual lead and engagement data.

TECHNICAL & SEO HANDOFF

Search intent	Suggested page title: “Vyoma Interiors | Interior Finishing Studio in Patna”. Write unique service-focused H2s, concise meta description and descriptive alt text.
Accessibility	Correct heading hierarchy; keyboard access; form labels and errors; readable contrast; reduced-motion support; captions for any video.
Performance	Responsive images, modern formats, caching, reserved dimensions, deferred noncritical scripts and lightweight Instagram integrations.
Analytics	Track hero CTA, service selection, form start, form submit, WhatsApp clicks, call clicks, professional branch and qualified lead status.
Operational	Route leads to an owned inbox/CRM, prevent spam, document consent and test notifications on desktop and mobile.
QR / Beacons	Current visual QR is a WhatsApp placeholder. Replace the QR and linked text with the approved Beacons destination before release.

FIRST 30 DAYS / WHAT TO TEST

Test outcome-led versus service-led hero copy; service CTA versus general CTA; two-step versus short single-step form; WhatsApp position; and the impact of real project photographs on qualified enquiries. Use actual sample sizes before declaring a winner.

DEFINITION OF READY

The site is ready when claims are verified, images are licensed or owned, mobile UX works, every CTA has a destination, form submissions arrive correctly, QR links are approved, and performance has been checked.

09 / FINAL DESIGNER HANDOFF

What to approve before a single line goes live.

Use this page as the practical handoff checklist between Vyoma Interiors and the website designer.

BRAND	Original logo file; exact #07745D and #B88917; approved serif/sans font pairing.
HERO	One approved promise, three maximum approved images, CTA destination and contact availability.
SERVICES	Confirmed scope and exclusions for the four core services.
PROOF	Project counts and Bihar claims verified, or removed; genuine site photos and permissions.
CLIENT VOICE	Real testimonials, consent and source URLs; actual Instagram account and selected posts.
PROCESS	Agreed material, payment, change and handover policy; no unapproved guarantees.
COVERAGE	Featured locations, serviceability policy and India-wide enquiry language.
FORMS	Final fields, CRM destination, notifications, privacy/consent and mobile validation.
CONTACT	Phone, email, domain, WhatsApp destination and final Beacons URL for QR.
MEASUREMENT	GA4 or equivalent event plan, form source tracking and qualified-lead review.

THE STANDARD

A premium site is not a luxury photograph followed by a long form. It is a calm, credible sequence that helps the right homeowner understand the work, evaluate the studio, and confidently begin a useful conversation.
